

## Clinical pharmacy Program Bachelor of Pharmacy (Pharm D) (Clinical Pharmacy)

### Vision:

Leadership, Excellence and Achieving Sustainable Development in the Field of Clinical Pharmacy Locally and Internationally in a manner that Supports the advancement of the Profession and enhances the quality of Health Care and Pharmaceutical Services.

### Mission:

The Bachelor of Pharmacy (Pharm D) Clinical Pharmacy Program at the Faculty of Pharmacy, Mansoura University, aims to qualify pharmacy professionals in the field of clinical pharmacy equipped with the fundamental competencies of knowledge, behaviors and skills, which qualifies them to compete in the labor market, contribute to the delivery of comprehensive patient-centered healthcare, and advance pharmacy practice and scientific research to serve the community.

### Aims

1. Fostering the pharmacist's role in delivering appropriate healthcare both in hospitals and outpatient settings by monitoring patients' medication regimens, understanding clinical pharmacokinetics, and applying this knowledge to treat a variety of medical conditions. This involves working closely with the treating physician to create optimal treatment strategies, ultimately enhancing patient care and minimizing drug-related risks and interactions.
2. Graduating highly competent pharmacists equipped to work in diverse environments, including public and private pharmacies, pharmaceutical companies, drug control laboratories, food testing, as well as in media, marketing, research, and academic sectors.
3. Boosting the regional competitiveness of graduates through targeted educational and training programs designed to enhance their skills and knowledge.
4. Contributing to community service and environmental sustainability while generating tangible economic benefits by advocating for the rational use of medicines within hospitals.
5. Dedication to maintaining quality standards in pharmacy education by incorporating interactive learning approaches and promoting self-learning to foster continuous development.
6. Contribute to community welfare and environmental progress with generating significant economic benefits by promoting the effective use of medications within hospitals.
7. Pursue continuous learning by advancing knowledge in contemporary pharmacy practices, and developing leadership, innovation, and entrepreneurship abilities.
